CAUSING LITIGATION

Citizens of Kaysville, County Commissioners and State Board of Health in Court.

KAYSVILLE, Aug. 1 .- How to legally and amicably drain a stagnant pond which occupies a portion of the main street of Kaysville, is a problem now engaging the attention of the Davis county commissioners, the Utah state board of health, a number of Kaysville citizens and Judge J. A. Howell of the second district court.

The pond in question is a natural "sink hole," one-half mile west of

the business center of Kaysville, and about two acres in extent. A pertion of the pond lies directly in the main street of the town. Some weeks ago the stagnant water was declared a mensea to health be. and music halls.

Special to The Tribune.

PROVO, Aug. 1.—Active steps are being taken by Jesse Knight, J. B. Keeler, George H. Brimhall of Provo: D. S. Page, Jr., and many other citizens of Payson to formulate a plan that will in any event secure the early construction of the Strawberry project "high line" canal, designed to carry water to the south end of the tract. This action is independent of that taken by the water users' association.

users' association.

It is contemplated by those interested in the construction of the canal at an early date, that a presentation of their claims and desires in proper form before the department of the interior will result in an examination of the ground and the situation by a government expert. The aid of the Utah congressional delegation will be asked.

If arrangements can be made to finance the canal, it is desired to begin work with the least possible delay in order that the water may be secured in time for the irrigation of beet lands next year.
